

If you
only knew

What are you saying?

In life, every color has a meaning.
In color, every shade defines a mood.

CX-10, changing so much more than color

The new CX-10 is not just the next color changer in the Martin range - it is an evolution in decorative lighting.

Using the boundless combination of color and pattern, the CX-10 layers every environment with the shape and shade of its intended use, pronouncing the message your club, your space, your decor wants to communicate.

Featuring a motorized color and effect wheel and mesmerizing morphing and floodlight effects, the CX-10 lets you redecorate your space from moment to moment with just the right mood and message.

The CX-10 is extremely versatile in its application usage. Designed to suit a wide array of environments such as clubs, restaurants, rental and stages, the CX-10 gives you light as an alternative to building materials, setting the mood and promoting individuality.

Color wheel

A motorized color wheel with 13 interchangeable colors plus open, gives split color function and a continuous scroll effect.

Effect Wheel

A motorized, double sided effect wheel gives you a total of 13 dual positions and the ability to overlap effects.

Each position can be fitted with colors, CTC filters, gobos, textured glass or beam apertures.

(See images below for some of the effects in standard configuration).

Extreme Floodlight Effects

Unique in such a fixture, the CX-10 uses floodlight effects to disperse light into every corner of the room – no matter what the space.

Extreme Output

The CX-10 is the big brother of color changes. A powerful 250W discharge lamp and a highly efficient reflector give a forceful beam of light to detail every pattern.

Frost, Dimmer and Strobe Effect

The CX-10 comes with a frost filter to sharpen or soften the projected color, a variable speed strobe and an exceptionally smooth dimmer.

Silent operation and easy maintenance

The CX-10 has temperature controlled fans that sense when the product is dormant and powers down to reduce noise pollution.

Compact design

In the CX-10, design starts even before the light hits the lens. Despite its abundance of features, the CX-10 is a compact and elegant fixture that won't crowd your ceiling.

Easy maintenance and low noise formula

A combination of mechanical and design factors coincide to reduce noise emission to the comfortable levels demanded by theatres and studios.

Easy access to lamp and parts make CX-10 fast to clean and service.

...and much more...
